

## **STREET LIGHTS**

### REPORT OF DEFECTIVE STREET LIGHTS

The Municipality relies on your vigilance to report problems with street lights that are no longer lit, that are damaged, or that turn on and off non stop.

To report any damage or problem on any municipal roads and streets in the municipality, please contact the municipal office at 819-826-3555 .

If you call outside office hours please leave a message on the answering machine.

We will need some details, such as:

- The location of the break with the street address (civic number and road name) or the intersection so that the location of the defective fixture is clearly located.
- Specify the nature of the problem: either it does not turn on, it turns on and off regularly, or the pole is damaged or broken.

However, take note that a light that stays on at all times does not need to be reported
