

SEND US PICTURES

It is still time to send us your photos for the 2023 calendar. Get your cameras out to take the best picture, anywhere throughout the municipality.

Do not forget to indicate where they come from within the municipality.

Please make sure to respect the following characteristics:

- 8x10 Horizontal JPEG format;
- 2 MB minimum;
- Resolution of 300 pixels minimum;
- Color pictures.

You can send us several photos. In order to cover the 12 months of the year, we are looking for images representing the 4 seasons of the year.

Send by email to admin@melbournecanton.ca or by WeTransfer.

SUCCESS FOR OUR TREE DAY

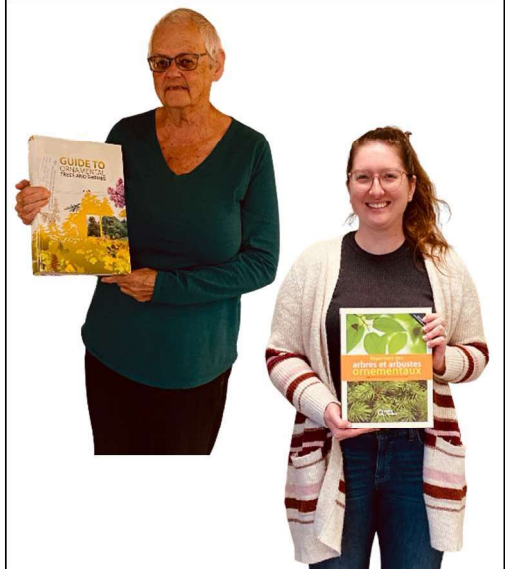

Saturday, May 21st was Tree Day in its original format.

Over thirty (30) families came to meet us and left with a tree ready to plant and for some a few shovelfuls of compost.

Five varieties of trees and conifers were available on that day: black cherry, bur oak, sugar maple, red maple and white pine. All the trees found takers.

In addition to the free trees and compost, each citizen was given a coupon to participate in the draw for one of the two "*Directory of ornamental trees and shrubs*"

The winners are Mrs. Darlene Boccarrossa and Mrs. Akeem Brown. Congratulations to you both!

EMPTYING OF SEPTIC SYSTEM

Notice to citizens who are on the list of septic systems to be emptied in 2022, remember that you will have to prepare the site to facilitate the passage of the truck. Each property to be visited will receive an explanatory letter 15 to 20 days before the week scheduled on the calendar. This service should start around mid-July.

The roads targeted for 2022 are:

Arel – Baker – Burrill – Coddington – des Colibris – Converse – Denman – Dénommée – Deslandes – Dinelle – Doyle – Ely – Fortier – Fraser – Galbraith – Gee – Goupil – Healy – des Hirondelles – Hume – Husk – Johnston – Lay – de Montréal – Nadeau – Poirier – Thomas – de la Vallée de Melbourne - route 116 et route 143.

Check your mailbox.

Visit our website www.melbourne.ca to get further information at the *Citizens / Services + / Emptying of Septic Tank* section.

DOMESTIC COMPOSTING

The Township of Melbourne strongly encourages its citizens to practice home composting since there is no collection with the brown bin. Many residents now use this method. For information on home composting, visit our website in the environment section.

We still have a few **mini compost bins** available free of charge at the municipal office.

For citizens who would like to get a *280-liter composter*, the municipality is awaiting instructions to acquire several bins and then offer them at an affordable price. Contact us at the municipal office to register on our list.

LITTER IN THE DITCH

As spring comes around, it is not uncommon to find unusual things in the hollow of a ditch. From a sofa to a ceramic toilet, from construction materials to mattresses, each of these items must be brought to the *Ecocentre*. All this generates costs for the municipality and therefore for all the citizens of Melbourne. If you believe you have witnessed such an act, please report it to the Sûreté du Québec by calling (819) 826 3755.

Let's be proud of our municipality and help us keep it clean.

- STATUTORY HOLIDAY: Office will be closed on Fridays June 24th and July 1st.
